

Want to know more about infrared thermometry and thermal imaging technology?

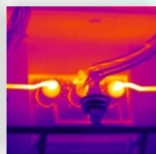

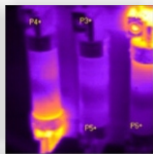

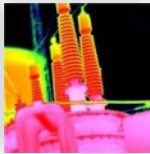

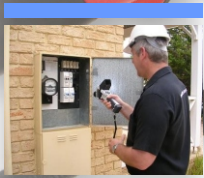

IRtek International, a global company in non-contact infrared thermometers and thermal imaging systems, would like to invite you to attend our tradeshow!

You're invited to see the latest products and get hands-on experience with all sorts of infrared thermometers and thermal imagers! Learn how this non-contact infrared thermometers and thermal imagers are used to find problems, improve safety, save your plant operating cost, etc.

How to find problems lurking behind the scenes "inside" your systems

- Inspecting electrical systems, motors, and generators
- Industrial manufacturing — process and plant maintenance
- Fire safety and protection
- Inspecting for building and construction
- Long range applications for power plant
- Automotive troubleshooting and diagnostics
